Air Compression Therapy System

what is IPC?

(Intermittent Pneumatic Compression)

Air chambers and air pumps are used to produce air compression massage for the legs and waist. Through the repeated sequential and intermittent inflation and deflation of the air chambers, air compression therapy is effective in promoting good blood and lymph circulation, improving metabolism and expanding blood vessels in the body. IPC therapy as a physical therapy method which is widely adopted by physiotherapists to make treatment for lymph edema relief, poor blood circulation, sports recovery, limb paralysis and limb pain relief.

Applications

Lymphatic edema relief

Muscle relax

Anti DVT

Blood flow stimulation and poor blood circulation.

Post-surgery recovery, sports injury recovery

Malformation of limb

Slimming & massage

Professional athletes and fitness enthusiasts

We offer fast-acting, professional, and scientifically backed sports recovery solutions that are easy to use, intelligent, and highly efficient. Designed for a variety of settings—including competition venues, training centers, and sports facilities—these solutions are ideal for sports training, post-competition recovery, and injury prevention.

Team physician, recovery specialist or strength and conditioning coach

Our system delivers scientifically sound treatment plans, equipping athletes with more professional training and post-competition recovery support. It can be used to treat acute sports injuries and prevent them from worsening; it also supports simultaneous use by multiple athletes on different body parts, serving more athletes and improving operational efficiency.

Sports medicine specialist and physical therapist

The cutting-edge smart technology integrated into our system expands the range of rehabilitation options, making non-surgical physical interventions more readily accepted by patients.

Differentiated Business Strategies for Sports Venues and Fitness Facilities

Make full use of underutilized and fragmented spaces within your facility to provide athletes with unique services and experiences, thereby creating new revenue streams.

Precise Pressure Level Display Colored LCD touch screen

These specially designed for those professional sports clubs , athletes , coaches or physiotherapists . Equipped with larger capacity 5200mAh Li battery and high power pump. Featured with colored LCD screen , fast air inflation , pressure upto 260mmHg. To be the highest level , to be the best performance for recovery .

Features

- + Large screen and digital display.
- + Free time setting.
- + Powerful and dynamic air pressure massage.
- + Computer program automatically control.
- + Longest treating time reach 90 minutes.
- + Pressure from 30 to 260 mmHg
- + Six Optional modes for most comforts.
- + Large volume built-in lithium battery.
- + High Power DC Pump
- + Treatment effect proved by professional athletes and physiotherapists
- + Very precise parameters regulation
- + Patent-Pending OptiFlow Technology
- + Possibility of changing treatment parameters during operation
- + Skip care and intensive care function could be chosen separately
